Document Body

Gerry,

I understand from Harry Ball that you have worked on Treasure Island in the past. I am currently the RPM on the site. As you may know, this is now a DTSC-lead site. EPA still has 0.5 FTE to provide oversight, but no contractor support. I recently received a *Draft Human Health Risk Assessment Addendum Installation Restoration Site 21* for Naval Station Treasure Island. It's a relatively short document. Comments are due on August 27.

Would you be able to take at least a quick look at this? The Addendum covers human health inhalation pathways base on soil gas measurements that are reported in the Addendum. I have both a paper copy and a CD, but some of the appendices are only on the CD.

I know we are all busy, but I'm hopeful you would have the time to look at this.

Thanks
